

Sainsbury's product guidance for VEGANS

About this list

This list contains Sainsbury's own brand products that are suitable for a vegan diet. As there is currently no legal, common definition for the word **vegan**, Sainsbury's uses the following definition of **vegan** for application to Sainsbury's own brand foods: "A vegan avoids anything produced by live animals in addition to any ingredients derived from dead animals.

A vegan will avoid the following.

- Animal Flesh, including meat, fish, poultry and shellfish.
- Stock made from animal flesh, as above, or from bones (in bouillons, stocks, soups and sauces).
- Animal Fats, including lard, suet and dripping (as an ingredient, for frying, greasing pans etc)
- Milk and milk products e.g. cream, butter.
- Milk derivatives e.g. lactose, lactates, caseinates.
- Cheese and whey powder, regardless of the rennet source.
- Honey and all other bee products (e.g. royal jelly, propolis, bees wax)
- Wines, wine vinegar, beers, ciders clarified using caseinates or egg albumen.
- Lanolin, the precursor of vitamin D

Our suppliers and product technologists have ensured that all products contained in this list do not contain any ingredients that are, or are made from, ingredients derived from animals. The risk of these products being contaminated with animal products at any stage of the supply chain or production process has also been effectively managed.

The most up-to-date information is always on the product packaging and you should always check the label at time of purchase.

Using the list

Our Product Guidance Lists feature 2 sections. The first list shows all the products that have been added to the list this month. The second list shows all Sainsbury's own brand products (both existing and newly added to the list) that are suitable for people following a vegan diet.

This list **does not** include products from the ***In Store Bakery***, the ***service deli***, the ***hot food counters***, ***fresh meat*** and ***fresh fish counters***, Sainsbury's ***café*** or the ***self-service salad bar***. This is because we advise people with allergies to avoid all of the products sold in these areas due to the potential risk of cross contamination caused by the open food handling.

Within the list, the products are divided by categories e.g. Fresh meal solutions, Dairy, Biscuits etc.

These categories are then divided into sub-categories. So in **Fresh meal solutions** you will find Classic meals, Inspired to Cook, Fresh Italian meals, Fresh Indian meals etc. Following each sub-category there is a four digit number in brackets, e.g. Fresh Italian meals (0015). This is the department code that is unique to the sub-category, this code may help the Sainsbury's colleague in store find the product for you.

The **first column** of the list contains some numbers, used internally by Sainsbury's, called **SKUs**. Each product has a unique SKU number and this may help the Sainsbury's colleague in store or on the customer service desk help you identify the product you are looking for.

The **second column** contains the **barcode** that appears on pack.

The *third column* is the product description. This is the name of the product that appears on the front of pack and it also includes the weight of the product.

How to search for products or product types

Are you looking for a particular product but don't want to trawl through the list? If you are viewing this on a computer all you need to do is press Ctrl and the letter 'F' (For mac computers press the 'Command' button and the letter 'F'). A box will then appear in the top right hand corner where you can type the name of the product, or type of product you are looking for and then press search. The computer will automatically find it for you if the product is included in the list.

How to identify the exact product from the list, when you're doing your shopping:

How to search on the grocery shopping website

You can search for any of the products listed below on the grocery online shop – www.sainsburys.co.uk/groceries . Simply copy and paste the SKU number from the list into the search box, and click Go.

You can also search for a list of products at once, by using our shopping list tool. Click on 'find a list of products' at the top of the page, and enter the SKU numbers (separated by a comma), and Click find products.

The screenshot shows the Sainsbury's website interface. At the top, there is a search bar with the text 'Search' and a dropdown menu set to 'Groceries'. Below the search bar, there is a navigation bar with links: 'Find a list of products', 'Store Locator', 'My Account', and 'Register'. The main content area is divided into two sections. On the left, there is a 'Shopping List' section with a text input field containing the SKU numbers '7256818, 1409789, 390828'. Below the input field, there are buttons for 'Find Products' and 'Clear List'. On the right, there is a 'Do we deliver to you?' section with a text input field for a postcode and a 'Check postcode' button.

Sainsbury's sub-brands and abbreviations used in the list:

basics. This is a wide range of staple products across food and GM, with Sainsbury's quality at the lowest price. Basics maintains our universal appeal and helps budget conscious shoppers lower the cost of their weekly shop. Customers should not have to compromise on their health or sourcing values - which is why basics foods are free from hydrogenated fats and artificial flavour enhancers, and are sourced with integrity

Taste the difference (abbreviated in the list to Ttd). This is Sainsbury's premium offering of food & drink, giving customers a wide range of high quality, fantastic tasting products. Our teams take time, care & attention to ensure we source the best ingredients & recipes from around the world, to deliver an outstanding taste experience.

be good to yourself (abbreviated in the list to bgty). This is Sainsbury's healthier option range where we have developed great tasting everyday essential products which are better for you because we have controlled the levels of fat, saturated fat, sugar and salt without compromising on taste. All products will either be less than 3% fat or reduced fat (containing at least 30% less fat than the standard equivalent product).

My Goodness. This is Sainsbury's 'naturally good' brand, targeted towards a customers looking for health through delicious, naturally good products. The products offer customers more of the nutrients and foods that we typically lack, such as fruit, vegetables, fibre, Omega 3, vitamins and minerals and controls what we eat too much of, being low in saturated fat, salt and sugar.

freefrom. Sainsbury's were the first major supermarket to introduce an own label free from range back in 2002. This range today now includes over 100 products that have all been specially made without wheat or gluten and most are also made without milk. Products are suitable for coeliacs and people with a wheat allergy. Most are also suitable for people with milk allergy or lactose intolerance.

All our products are developed in strictly controlled environments, ensuring we never compromise on safety, quality or taste.

Sainsbury's SO Organic. Food you can trust. This is Sainsbury's range of products where we have developed an organic alternative to most mainstream products. All organic farms and food companies are inspected at least once a year. The standards for organic food are laid down in European law, so a licence is required to grow process and market organic products. Farming practices aim to encourage wildlife and promote optimum soil health.

How to read Sainsbury's labels

For products where it is not obvious that they are suitable for vegans, you will see one of the following:

The following logos below:

Or the following statement:

'Suitable for vegans'

Nutrition information for vegans

Excluding cows' milk from the diet can potentially lead to inadequate intake of certain nutrients including some B vitamins and especially calcium. Alternative sources of calcium include fortified soya milk and soya products, fortified cereals and bread, dark green leafy vegetables and pulses. Calcium from some of these sources (e.g. pulses and cereals) is less well absorbed than from milk and dairy so you may need to take in larger amounts.

Iron: Plant sources of iron include dark leafy green vegetables such as sprouting broccoli or kale, whole meal bread, apricots, lentils, pulses and fortified breakfast cereals. However, iron from vegetable sources is not as well absorbed by the body as iron derived from red meat. One way of increasing the efficiency of iron absorption is to eat the food with a good source of vitamin C. For example, have a glass of orange juice with your breakfast cereal.

Eggs are a good source of vitamin B12, B2 and vitamin A so check that you include other sources of these vitamins in your diet. The best plant sources of vitamin A include dark green leafy vegetables and orange coloured fruit and vegetables. Alternative sources of vitamin B2 are rice and fortified breakfast cereals. Only animal derived foods (meat/dairy) and fortified breakfast cereals can supply Vitamin B12 so ensure you include plenty of fortified foods such as breakfast cereals or consider using a supplement. For vitamin D you will need to ensure that you get enough sunlight.

Fish and shellfish are good sources of a variety of vitamins and minerals, and oily fish is particularly rich in omega 3 fatty acids. If you are avoiding fish, make sure you eat other sources of omega 3 fatty acids. Plant-based seeds and

oils that are good sources of omega 3 fatty acids are linseed, flaxseed, walnut and rapeseed. Try and include these plant sources in your diet every day.

Dairy products and eggs are important sources of the essential amino acids – those amino acids that can't be made by the body and need to be obtained from food. Other sources include, lentils, beans, soya, nuts, seeds and grains, such as wheat, barley, oats, rice and quinoa. Eat a variety of vegetable proteins in order to gain all the essential amino acids from these plant sources.
